

## CASE STUDY

# Leading global residential and commercial access solution provider opens doors for its partners with Power BI visuals

**Industry:** Consumer Goods

**Employees:** 1,000 - 9,999

**Location:** United States

## CHAMBERLAIN GROUP

### Products and Services:

- Microsoft Power BI
- Microsoft Power BI Embedded
- Microsoft Power BI Visuals

### Problem Statement:

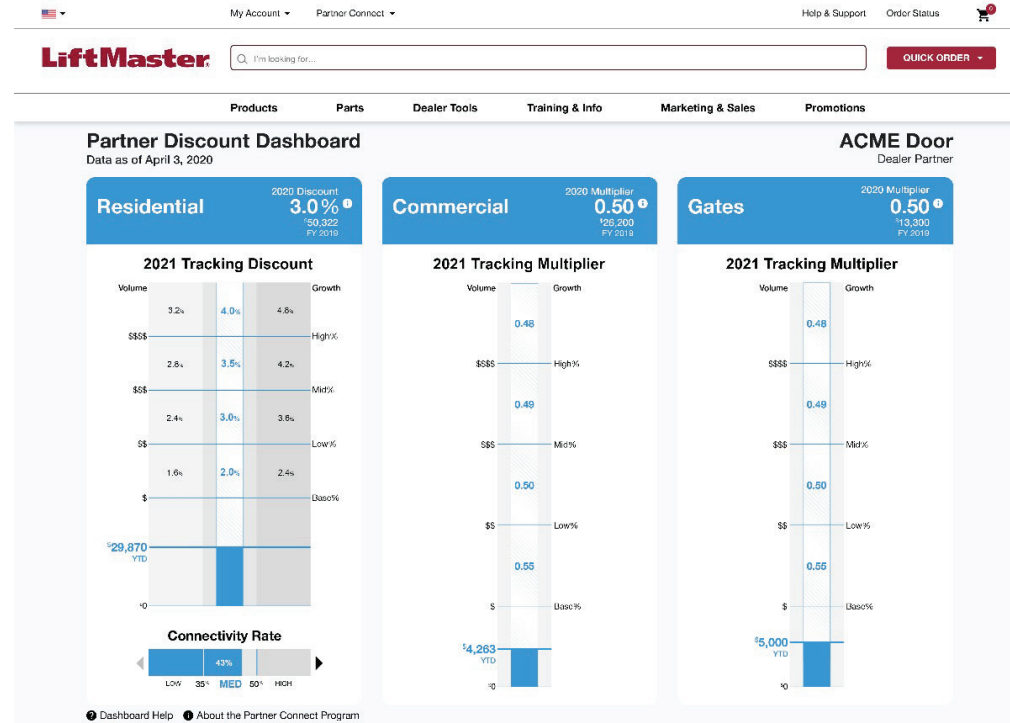

As it developed a transformative business strategy model, leading residential and commercial access solution provider Chamberlain Group sought a data visualization solution that was powerful, cost-effective, yet easy to use for its channel partners.

### Solution:

The company implemented Microsoft Power BI Embedded and Power BI visuals, working with Microsoft Partner Network member Visual BI to create the custom visuals it needed. It deployed the solution to thousands of dealer partners in the United States and Canada.

### Impact:

Chamberlain Group created and deployed the solution within four months. Whether its partners are large, well-established stores or single proprietors working out of their vehicles, they all find the system easy to use—and to profit from.

*"In addition to scalability, reliability, value, and an intuitive user interface, we wanted a solution that we could easily support going forward. After examining all the options, we selected Microsoft Power BI Embedded."*
