

# Leading COVID-19 Vaccine Manufacture, Novavax Inc. uses xViz Gantt Enterprise to increase productivity allowing them to streamline projects, reporting, and scheduling.

 Company : **Novavax Inc.**       Industry : **Pharmaceuticals & Healthcare**       Location : **Maryland, United States**

As a leading vaccine developer in the market, Novavax Inc. looked towards improving their reporting and dashboards that involve project scheduling and planning. Many of their project managers needed to leverage technology to meet crucial deadlines and to increase productivity.

Novavax Inc. was looking for a solution that would enhance their Power BI reporting with advanced features and functionalities. They needed a project management visual which could provide real-time information but at the same time be visually appealing to senior management, partners, and government agencies.

Kyle Langham, the Director of Data & Analytics said, "We needed a tool that disseminates scheduling information, project planning, and key deliverables such as the COVID Vaccines to our stakeholders in real-time. The presentations used previously, were untenable when the scope of the company expanded".

## LEVERAGING XVIZ TO IMPROVE PROJECT REPORTING & PRODUCTIVITY

The data & analytics team of Novavax Inc. evaluated all the project management visuals in Power BI and they all came up short of expectations, except Visual BI's xViz Gantt Enterprise, which met all their needs to leverage their data for key business decisions and at the same time improve productivity by saving many hours of time every week.

### A SOLUTION THAT WOULD ENABLE THEM TO:

Leverage analytics to drive key business decisions

Report real time information provided to key stakeholders and other partners

Increase productivity of the team by managing time efficiently

Create visually stunning dashboards & reports for presentation

Maintain Data Integrity & Security

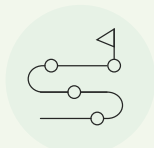

“The information presented is real time. This has increased the integrity of our data greatly and gives you the confidence that you are seeing the updated information. Tracking deliverables and the ability to filter through large volumes of data with quick responsiveness enabled us to increase productivity. We found the best of all functionalities of other Gantt visuals in xViz Gantt Enterprise!”– says Kyle on choosing xViz as a solution.

“ xViz was highly customizable and the functionalities offered were the right fit for our business. It also enabled data integrity which is incredibly valuable to driving key business decisions! ”

**Kyle Langham,**  
Director of Data & Analytics,  
Novavax Inc.

## FAVOURITE FEATURES

Customization  
of timelines & milestones

Advanced  
Filtering Capabilities

Interactivity & Responsiveness  
to large datasets

Realtime visually interactive  
visual representation

## ABOUT NOVAVAX INC.

Novavax is a late-stage biotechnology company dedicated to improving health globally through the discovery, development, and commercialization of innovative vaccines.

Their product pipeline targets a variety of serious infectious diseases, from influenza to emerging infectious diseases. They are developing NVX-CoV2373, a vaccine candidate against SARS-CoV-2, the virus that causes COVID-19. Headquartered in Gaithersburg, Maryland, Novavax has additional facilities in Uppsala, Sweden and Bohumil, Czech Republic.
